Winnie Davis: Daughter of the Lost Cause is a biography of Varina Anne "Winnie" Davis, the youngest daughter of Confederate president Jefferson Davis, born in 1864 amidst the throes of the Civil War. After the South's defeat, she would spend a large part of her life abroad as an American expatriate. Christened the "Daughter of the Confederacy" in 1886, she was idolized by a Southern culture still affected by the bitterness of defeat. Her status as an icon of the Lost Cause threatened to overshadow her life, despite her talents as a professional writer, and caused great uproar over her engagement in 1890 to a Northern lawyer and grandson of a famous abolitionist. A fascinating story of a woman who sought to reconcile her own family history with her own beliefs in the virtue of tolerance, Winnie Davis: Daughter of the Lost Cause is highly recommended especially for personal and public library biography collections.
